Disclaimer:

Forex trading has large potential rewards, but also large potential risk. You must be aware of the risks and be willing to accept them in order to invest in the forex market. Don't trade with money you can't afford to lose. This ad/presentation is neither a solicitation nor an offer to trade forex. No representation is being made that any account will or is likely to achieve profits or losses similar to those discussed on this ad/presentation. The past performance of any trading system or methodology is not necessarily indicative of future results.

Trading foreign currencies is a challenging and potentially profitable opportunity for educated and experienced investors. However, before deciding to participate in the Forex market, you should carefully consider your investment objectives, level of experience and risk appetite. There is considerable exposure to risk in any foreign exchange transaction. Any transaction involving currencies involves risks including, but not limited to, the potential for changing political and/or economic conditions that may substantially affect the price or liquidity of a currency.

Moreover, the leveraged nature of FX trading means that any market movement will have an equally proportional effect on your deposited funds. This may work against you as well as for you. The possibility exists that you could sustain a total loss of initial margin funds and your position will be liquidated and you will be responsible for any resulting losses.

Investors are recommended to lower exposure to risk by employing risk-reducing strategies such as 'stop-loss' or 'limit' orders. **Investatech Inc., PipBoxer.com and/or the author of PipBoxer Expert Advisors (i.e. Al Parsai/aparsai/pipboxer) and strategy will not be held responsible for the reliability or accuracy of the information available on this ad/presentation.** The content provided is put forward in good faith and believed to be accurate, however, **there are no explicit or implicit warranties of accuracy or timeliness made by Investatech Inc., PipBoxer.com and/or Al Parsai/aparsai/pipboxer.**

CFTC rule 4.41: Hypothetical or simulated performance results have certain limitations. Unlike an actual performance record, simulated results do not represent actual trading. Also, since the trades have not been executed, the results may have under-or-over compensated for the impact, if any, of certain market factors, such as lack of liquidity. Simulated trading programs in general are also subject to the fact that they are designed with the benefit of hindsight. No representation is being made that any account will or is likely to achieve profit or losses similar to those shown.%
